

Install Necessary Plugins

After installing the theme, you can see the plugin requirements in **Appearance -> Themes**

Most of them are required for the theme to function properly, but some are optional depending on your needs:

- **Contact Form 7** -> Add if you plan on using the Contact Section widget.
- **One Click Demo Import** -> Add if you want to use the demo import functionality

Install and Activate the plugins

In **Appearance -> Themes** click on **Begin Installing Plugins**.

Screenshot of the WordPress admin dashboard showing the Themes screen. The left sidebar is highlighted with a blue box around the Appearance section, which contains the Themes item with a red notification badge. The main content area shows a theme preview for 'Sapuniko' featuring a dark background, a circular profile picture of a person, and a 'Customize' button.

This theme requires the following plugins: [Elementor](#), [Font Awesome](#) and [Sapuniko Portfolio Plugin](#).

This theme recommends the following plugins: [Contact Form 7](#) and [One Click Demo Import](#).

Blog

Marshland birds at the Lake Havasu National Wildlife Refuge

The Florida-based photographer known for his pioneering underwater photography, creates stunning series of images that capture the vibrant life beneath the waves, including those taken at John Pennekamp Coral Reef State Park located off the coast of Key Largo. His work in this genre is characterized by its breathtaking clarity and composition, revealing the intricate details of marine life in their natural habitat without disturbing them. The photographs taken in John Pennekamp Coral Reef State Park are particularly remarkable for their technical precision and artistic composition, showcasing colorful coral formations, schools of fish, and the dynamic interplay of light and shadow. By using slow shutter speeds and macro lenses, he captures images with such detail and intimacy that bring the hidden wonders of the ocean to the public eye, inspiring appreciation for marine conservation. His images not only highlight the aesthetic beauty of underwater environments but

Twenty Twenty-Five

Install the required and the recommended (optional) plugins, depending on your needs.

You can always remove the recommended ones later.

IMPORTANT: Install and activate the plugins one by one to prevent errors.

The screenshot shows the 'Install Required Plugins' page in the WordPress admin dashboard. The sidebar on the left is titled 'Appearance' and includes 'Themes' (with a red notification dot), 'Install Plugins', and 'Plugins'. The main content area has a heading 'Install Required Plugins' and a sub-section 'All (5) | To Install (5)'. It lists five plugins with their sources and types:

	Source	Type
<input type="checkbox"/> Elementor	WordPress Repository	Required
<input type="checkbox"/> Font Awesome	WordPress Repository	Required
<input type="checkbox"/> Sapuniko Portfolio Plugin	External Source	Required
<input type="checkbox"/> Contact Form 7	WordPress Repository	Recommended
<input type="checkbox"/> One Click Demo Import	WordPress Repository	Recommended

Below this, there is another section for 'Plugin' installations.

After installing each plugin, check if they are activated properly.

In **Plugins -> Installed Plugins** check if the plugins are active by looking for a **Deactivate** button next to every plugin as shown here:

The screenshot shows the 'Installed Plugins' page in the WordPress admin dashboard. The sidebar on the left is titled 'Plugins' and includes 'Add New Plugin', 'Elementor', and 'Installed Plugins'. The main content area has a heading 'Plugins' and a sub-section 'All (5) | Active (5) | Auto-updates Disabled (5)'. It lists five active plugins with their descriptions and deactivate buttons highlighted:

Import the Demo Content

We strongly advise using One Click Demo Import to setup your website to simplify the process (even if you will change the demo content later).

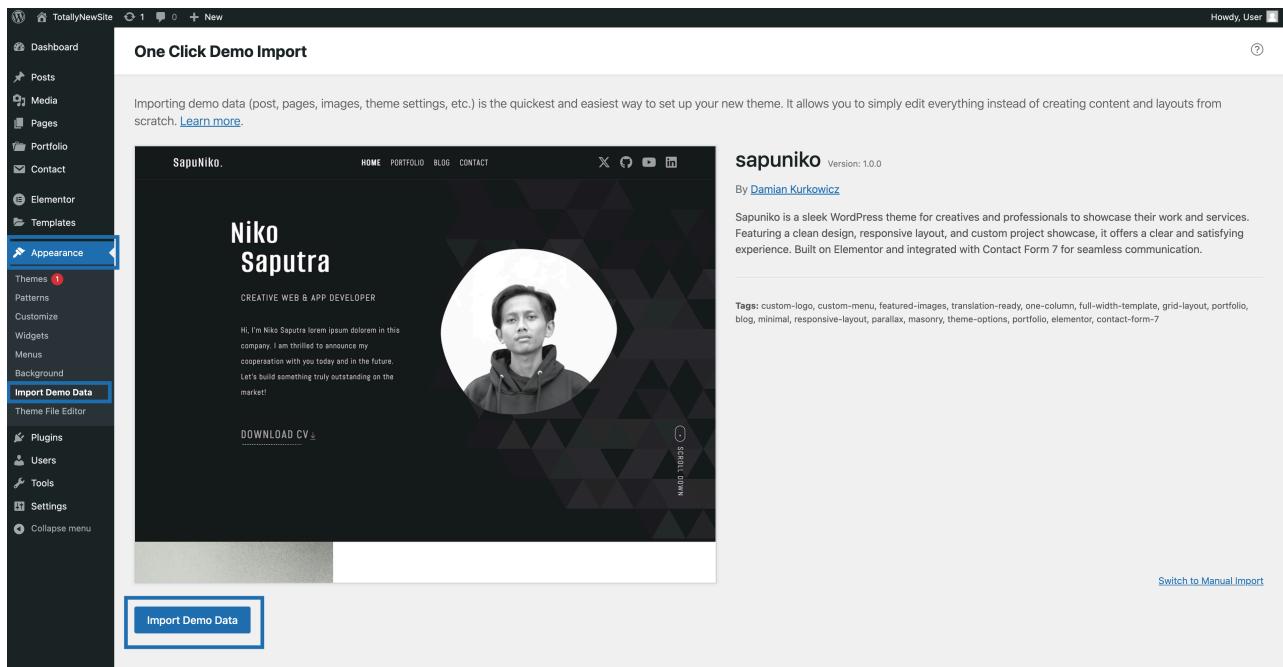

Activate One Click Demo Import plugin

If you haven't done so already, go to **Appearance -> Install Plugins**, then install and activate One Click Demo Import:

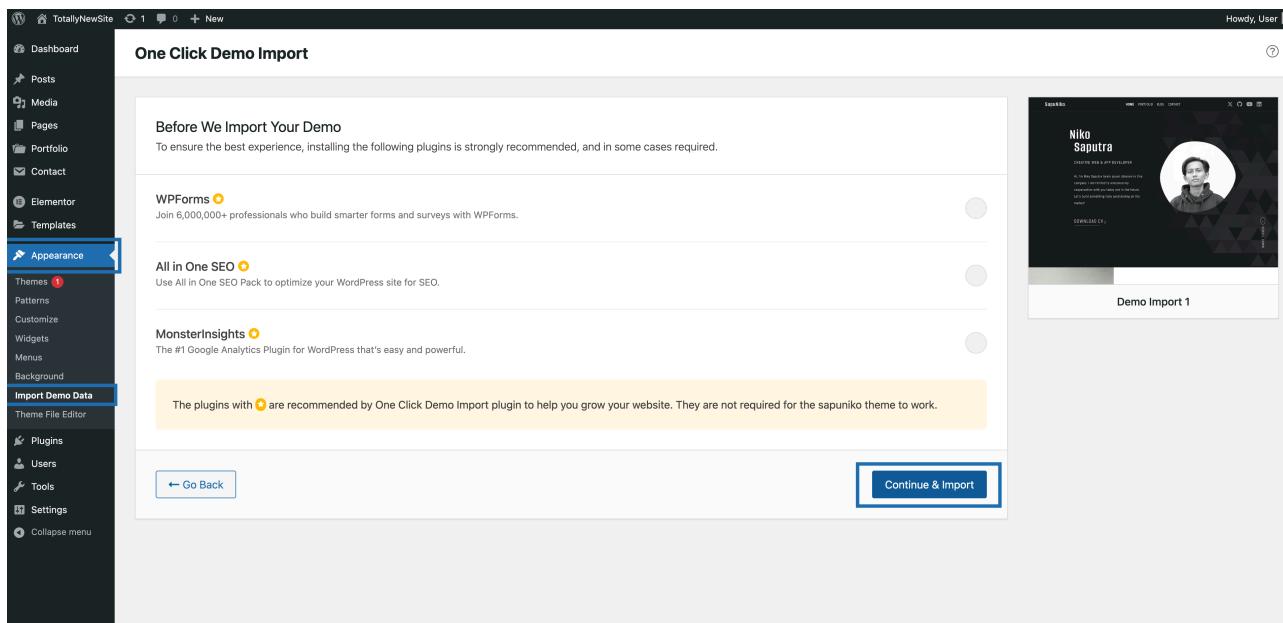

Begin Import

Go to **Appearance -> Import Demo Data** and click **Import Demo Data**.

Afterwards, click **Continue & Import**. The import will take some time.

After the import completed you should see something like this:

TotallyNewSite 1 New

Howdy, User

Dashboard Posts Media Pages Portfolio Contact Elementor Templates Appearance Themes 1 Patterns Customize Widgets Menus Background Import Demo Data Import File Editor Plugins Users Tools Settings Collapse menu

One Click Demo Import

Import Complete!

Congrats, your demo was imported successfully. You can now begin editing your site.

Demo Import 1

Version 6.7.2

Thank you for creating with [WordPress](#).

Header and Footer

Go to **Appearance > Customize** to start customizing.

Editing Logo

In the Customize menu go to **Site Identity**.

Change your logo (and other identity details) here:

The screenshot shows the 'Site Identity' settings in the WordPress Customizer. At the top right, there is a 'Published' button. Below it, the title 'Customizing Site Identity' is displayed with a back arrow icon. The main content area contains the following sections:

- Logo:** Displays the current logo 'SapuNiko.' and includes 'Remove' and 'Change logo' buttons.
- Site Title:** Set to 'TheNewestSite'.
- Tagline:** An empty input field.
- Site Icon:** A placeholder box with 'Select Site Icon' text.
- The Site Icon** is what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. It should be square and at least 512 by 512 pixels.

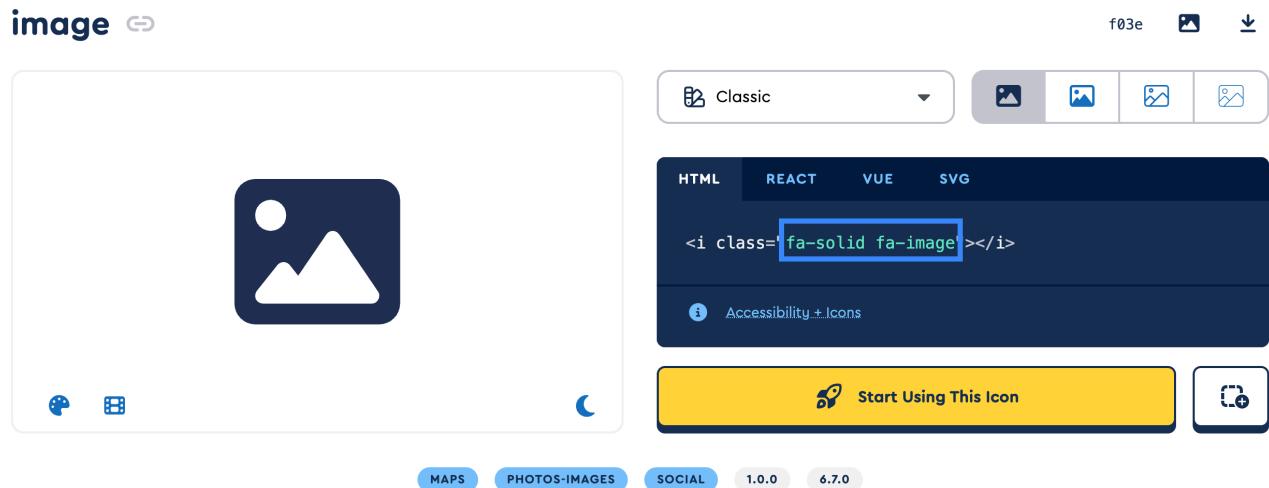

Editing Social Links

Edit your social links in the **Social Links** section of the Customize menu.

The screenshot shows the 'Social Links' settings page in the WordPress Customize menu. At the top right are 'Publish' and 'Settings' buttons. Below them is a breadcrumb trail: 'Customizing > Social Links'. The main content area contains instructions: 'Add links to your social media profiles here. Use [Font Awesome](#) to get class names.' It includes four sections for social media profiles:

- Social 1 URL:** Input field containing 'x.com'.
- Social 1 Font Awesome Class:** Input field containing 'fa-brands fa-x-twitter'.
- Social 2 URL:** Input field containing 'github.com'.
- Social 2 Font Awesome Class:** Input field containing 'fa-brands fa-github'.
- Social 3 URL:** Input field containing 'youtube.com'.
- Social 3 Font Awesome Class:** Input field containing 'fa-brands fa-youtube'.
- Social 4 URL:** Input field containing 'linkedin.com'.
- Social 4 Font Awesome Class:** Input field containing 'fa-brands fa-linkedin'.

You can copy **Font Awesome** class names for your icons:

Pages

Most pages should be edited using Elementor.

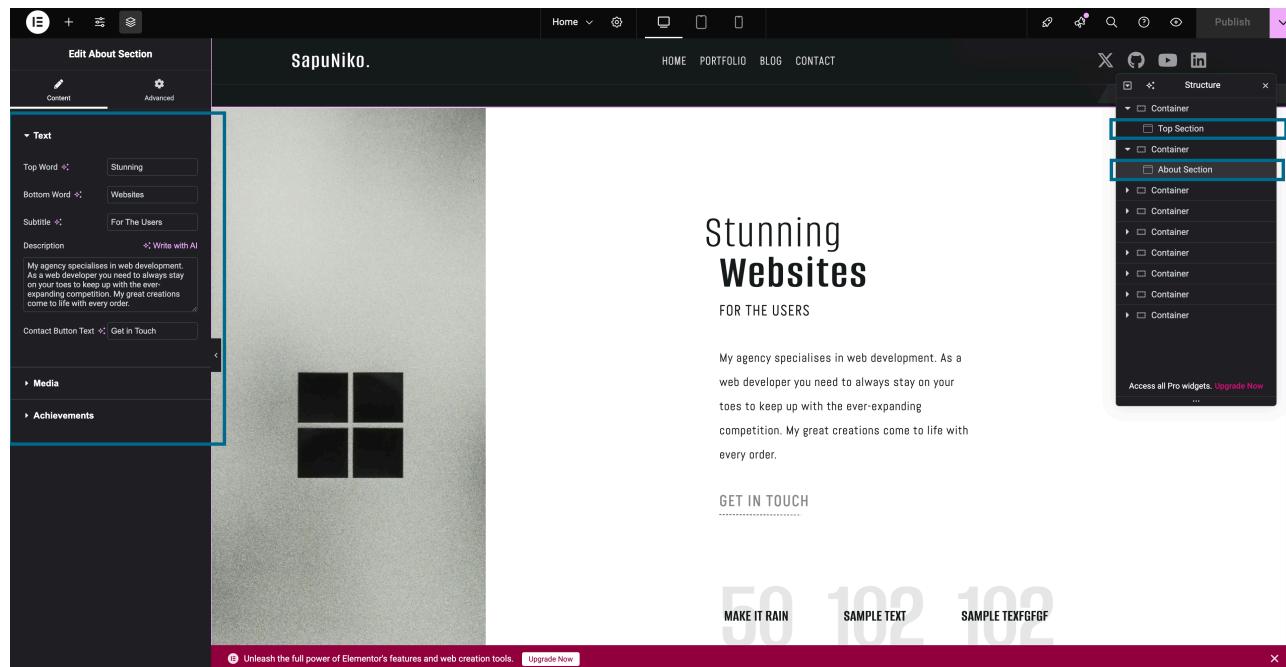

IMPORTANT: **Blog Page** and **Portfolio Page** should not be edited - they are post archives.
You are still able to edit Blog Posts and Portfolio Posts as described below.

You can edit a page with Elementor like this:

The screenshot shows the WordPress admin dashboard with the 'Pages' menu item selected. A modal window titled 'Love using Elementor?' is open, asking if the user wants to become a super contributor by opting in to share non-sensitive plugin data and receiving periodic email updates. Two buttons are available: 'Sure! I'd love to help.' and 'No thanks.' Below the modal, the main 'Pages' list is displayed. It shows four published pages: 'Blog — Posts Page', 'Contact — Elementor', 'Home — Front Page, Elementor', and 'Portfolio — Elementor'. The 'Edit with Elementor' link for the 'Contact — Elementor' page is highlighted with a blue border. At the bottom of the list, there are 'Bulk actions' and 'Apply' buttons.

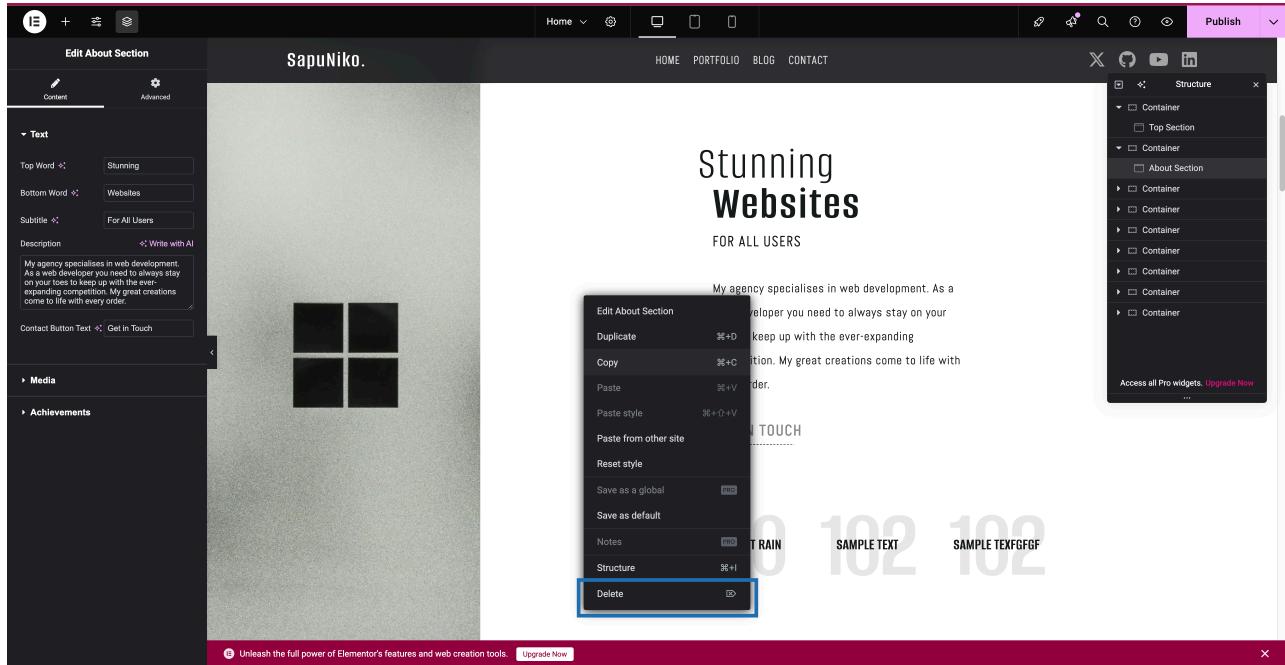

Editing Sections

Choose a section - either by clicking on it or choosing in **Structure Menu** on the right. Edit the details of each section in the **Edit Section -> Content** on the left.

Removing Sections

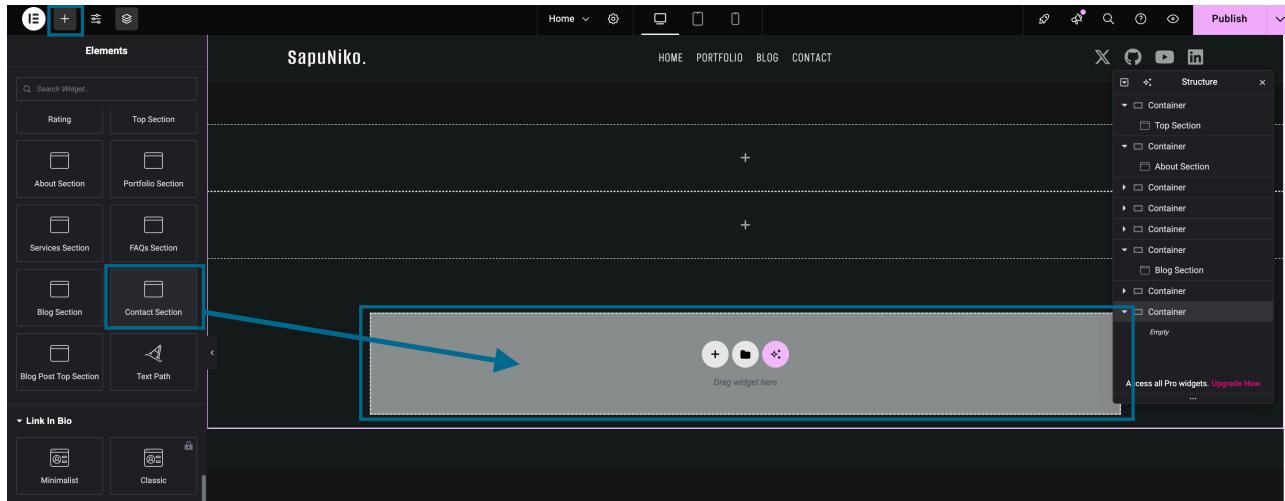

Right click on a section or choose it in **Structure Menu**. Then click **Delete**.

Adding Sections

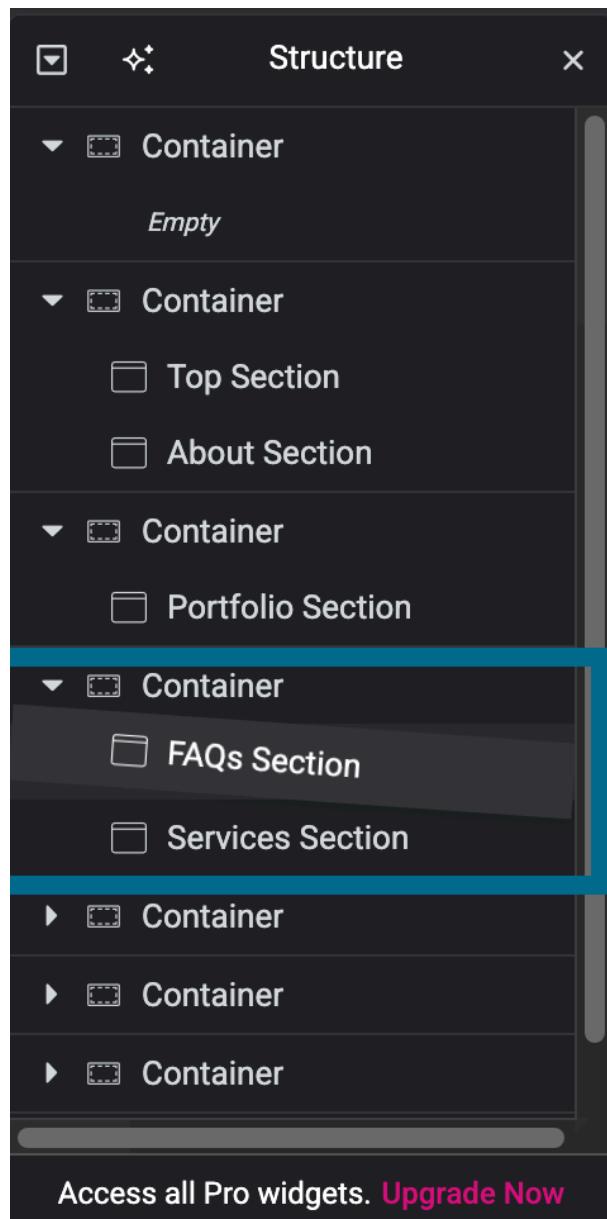

In order to add sections, click on the **+** icon in the top left corner, then choose a widget and drag it to the specified widget area.

IMPORTANT A full list of Sapuniko Elementor Sections/Widgets is on [this page](#).

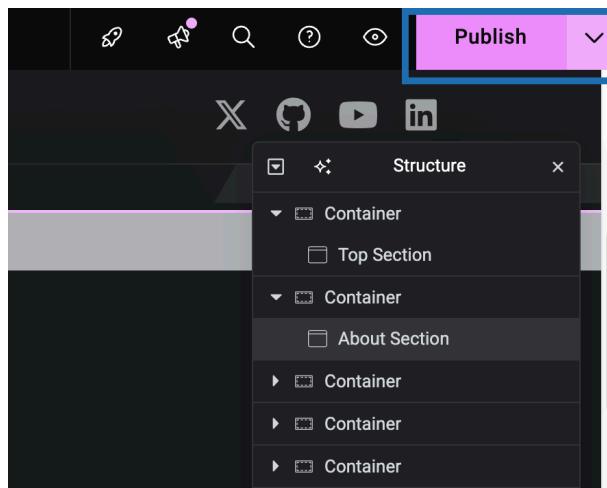

Changing Order of Sections

You can change the order of section by dragging them in **Structure Menu**:

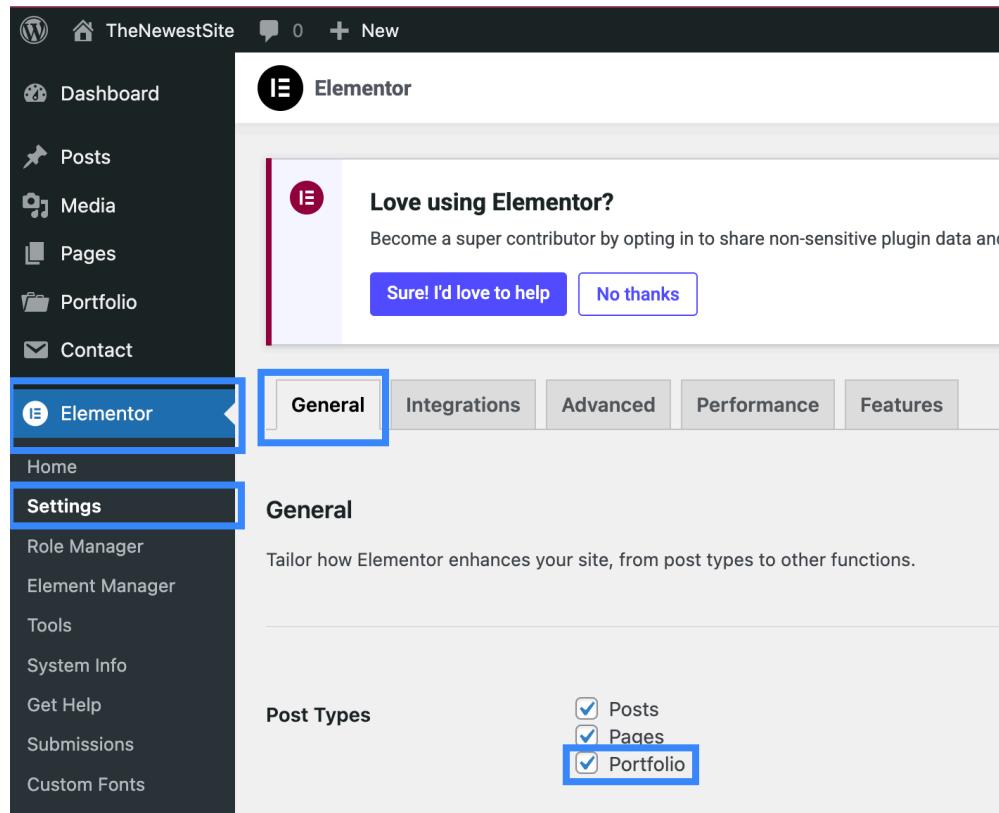

Publish

When you are done with the editing, **publish your changes**:

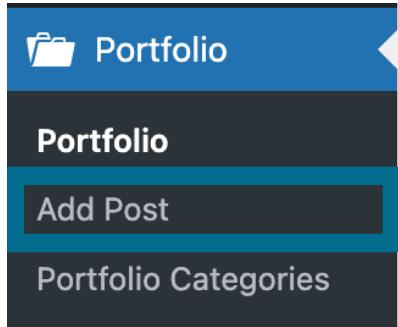

Portfolio Posts

Make sure that **Portfolio Post Type** is enabled in **Elementor -> Settings -> General** - this enables portfolio post editing.

New Portfolio Post

Click **Portfolio -> Add Post**

Fill in the details - Title, Category, Slug, Featured Image then click **Publish**

IMPORTANT: Do not fill the description, you should be doing that through Elementor, as described below.

A screenshot of the Elementor Project Editor interface. The top bar includes a 'W' icon, a '+' button, navigation icons, and buttons for 'Back to WordPress Editor' and 'Edit with Elementor'. The title 'My New Portfolio Post - Project' is at the top center. On the right, there's a sidebar with 'Project' and 'Block' tabs, a preview area showing a blue box labeled 'My New Portfolio Post', and a status bar indicating '36K'. The main content area shows a single section with a title 'My New Portfolio Post'. On the right side of the editor, there are several settings panels: 'Set featured image' (with a placeholder image), 'Generate with Elementor AI' (disabled), 'Add an excerpt...', 'Last edited a second ago.', 'Status' (Draft), 'Publish' (Immediately), 'Slug' (my-new-portfolio-post), 'Template' (Default template), and a red 'Move to trash' button. At the bottom, there's a 'Portfolio Categories' panel with 'Designs' checked and 'Programming' unchecked, along with an 'Add Category' link.

Editing the Post

In Your WordPress dashboard go to **Portfolio -> Portfolio** and click on **Edit with Elementor** to begin editing the chosen post page.

Creating New Portfolio Categories

You can create new categories in **Portfolio -> Portfolio Categories**.

Enter Name, Slug and a Parent Description and click **Add Category**:

Portfolio

Portfolio

Add Post

Portfolio Categories

Contact

Elementor

Templates

Appearance

Plugins

Users

Tools

Settings

Collapse Menu

Add Category

Name

NewPortfolioCategory

The name is how it appears on your site.

Slug

new-portfolio-category

The "slug" is the URL-friendly version of the name. It is usually all lowercase and contains only letters, numbers, and hyphens.

Parent Category

None

Assign a parent term to create a hierarchy. The term Jazz, for example, would be the parent of Bebop and Big Band.

Description

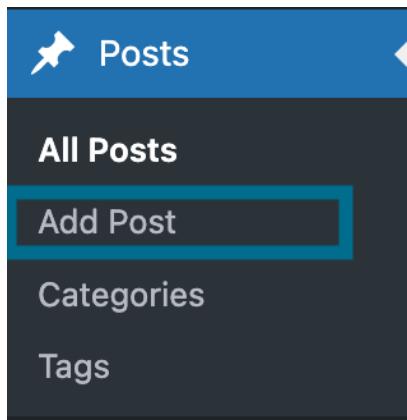

The description is not prominent by default; however, some themes may show it.

Add Category

Blog Posts

New Blog Post

Click Posts -> Add Post

Fill in the details - Title, Categories, Slug, Featured Image and content using the **WordPress Post Editor** then click **Publish**.

For further instructions regarding the **WordPress Post Editor** - [look here](#)

IMPORTANT: Text modifications such as color or letter spacing will not get reflected in the final site due to Sapuniko's post formatting. Bold/italic text will work just fine.

This is the content of the blog Post

You can even add images:

And **Code Blocks**:

```
console.log("Hello World!");
console.log("Thank You for reading this blog post.")
```

Type / to choose a block
